*L'identificativo ADIS è un codice identificativo univoco che viene assegnato automaticamente dal sistema informatico per le malattie animali (Animal Disease Information System - Regolamenti (EU) 2016/429 e 2020/2002) dell'Unione Europea nel momento in cui l'Autorità Competente di ciascun Stato Membro notifica un focolaio di malattia infettiva animale. Il numero effettivo di focolai è identificato dal progressivo nella prima colonna della tabella.

** diverse specie di volatili selvatici in cattività

§ Al fine di definire i confini delle zone di protezione e sorveglianza e la revoca delle misure applicate nelle zone stesse, si è applicato l'art. 12 punto 2 'L'autorità competente modifica i confini della zona soggetta a restrizioni iniziale, compresi i confini delle zone di protezione, delle zone di sorveglianza e delle ulteriori zone soggette a restrizioni, in caso di sovrapposizione di due o più zone soggette a restrizioni a causa di ulteriori focolai della malattia di categoria A' e l'art. 39 punto 1 a) e b) del Regolamento Delegato (EU) 687/2020 '1. L'autorità competente può revocare le misure di cui alle sezioni 1 e 2 del presente capo soltanto se è trascorso il periodo minimo di cui all'allegato X e se sono soddisfatte le seguenti condizioni:

- la pulizia e la disinfezione preliminari e, se pertinente, il controllo preliminare di insetti e roditori sono stati effettuati nello stabilimento colpito conformemente all'articolo 15; e
- in tutti gli stabilimenti che detengono animali delle specie elencate situati nella zona di protezione, gli animali delle specie elencate sono stati sottoposti, con esito favorevole, a esami clinici e, se necessario, a esami di laboratorio conformemente all'articolo 26'. Gli emendamenti delle stesse zone verranno regolarmente pubblicati con la Decisione di esecuzione (UE) 2021/641 della Commissione.
